

When my father asked me to write a letter to you about my experiences in IYG SPAIN 2015 there were so much I had in mind to write about that great experience I lived with other children from Cyprus but also from many other countries. Everything felt like a wonderful film. I want to thank the IPA of Cyprus who opted me to participate in the International Youth Gathering 2015 in Spain.

With the arrival of the Cypriot delegation in Barcelona the hospitality of the Spanish organizers was filling the room and because we knew the program that was going to follow we were impatient to enjoy it. I lived fifteen days full of activities, fun, acquaintances with children from around the world who became friendships and still continue until today.

I got to know the culture and civilization of Spain which is amazing. Cyprus was presented to the eyes of many other children and we were able to exchange ideas on how we live each one in our own country. An amazing experience that I will never forget. I had the opportunity to do activities that there was no way I could do them with my family in Cyprus such as living the experience of one of the largest theme park in Europe, cycling through the Barcelona with the escort of police motorcyclists, playing Paintball, climbing, canoeing, archery etc.

We traveled almost all over the country with excellent hostesses who looked after us like their own children. What you do in the IPA is excellent. Now I understood why my father always helps and supports the IPA; something I couldn't understand before. I had the opportunity to learn more about the International Police Association, principles and aspirations.

The time of the departure was difficult. We left behind us only awesome experiences and good friends. I want to thank once more the IPA Cyprus because it gave me the opportunity to live the best days of my life.
